

Intelligent Digital Clock

The unique feature of ZECONS Intelligent Digital Clocks is its ability to communicate with PC. This feature provides the advantage of synchronizing all the remote clocks with a press of the key from PC. In addition to setting time through PC, time in the clock can be set locally by using external keypad. Typical application for intelligent Digital Clock can be at Shop Floors, Reception Area, Gates, Auditorium, Meeting rooms, Conference Halls, Canteens and at various departments of any Industry, Hospitals, Airports, Railway Stations and so on.
