[WEB Standard Attendance Recording Software] is completely Automated software that allows the user to Organize and define the rules as per the organizational policies.

## Product Features

### ► *Company suitable Attendance Policy*

Every Company has different rules and policies for Time & Attendance. This Feature provides the Admin rights to define all the rules and policies like Late-In, Early-Out, Wage-Period, Weekly Off etc..

### ► *Leave Management*

Every Company has their own set of rules for Leaves and have different set of leaves such as CL, EL, PL etc.. The Admin is given full Authority to Set different leaves to different categories of people with Description. Admin can set the number of leaves that can be taken for every employee or department and also set and manage the Leave balance so that it can be carry forwarded, Encashment and Auto credit of Leaves end of the year.

### ► *Shift Management*

Every Company has different Shifts and it varies for different Departments, sectors etc. Admin can define and set all the shifts Accordingly whenever required. There are many options like Automatic shifts, Fixed shifts and rotational shifts which reduces the difficult manual management.

### ► *Dynamic Reports*

All types of Reports are available Separately but Dynamic Reports has the ability to generate any required reports Dynamically with Automatic Search & Sort options. This Report is very help full when you don't want to see all the reports separately and when you need complete information of an Employee or Department.

### ► *Auto Archiving/ Computation/ Backup*

- *Archiving:* Automatically keeps records of previous months in separate Archive table to make Application faster.
- *Computation:* Automatically Calculates all the values like In / Out to generate the Reports .
- *Backup:* Automatically takes the complete backup of database every month .

- **Upload of Masters :** One Click Upload Master Records from excel sheet to Sql Tables

### *SYSTEM CONFIGURATION:-*

- Operating Systems: Windows 7 & Above with 32/64 bit .
- Processor : Core 2 Duo , minimum 2.3 GHz
- RAM : Minimum 4 GB RAM
- Hard Disk : 500 GB
- Network Interface Card

### *SOFTWARE CONFIGURATION:-*

- JDK v.7 or above
- APACHE TOMCAT 7/8
- Microsoft .NET Framework v 3.5 SP1
